

COASTAL SOURCE

BOLLARD™ Speakers

Patented

All Bollard models offer very high performance sound in a simple and clean style that blends well with all outdoor environments.

Like all Coastal Source systems, the Bollard line incorporates our patented Plug+Play cabling system that ensures superior performance, reliability and speed of installation. Poor quality connections, out of phase polarities and shorted connections are a thing of the past.

Bollard features and benefits:

- Superior sound quality due to the rigid solid composite one-piece enclosure, custom drivers, sandwich cone technology and high quality component crossover.
- Large driver radiating area and enclosure volume delivering unmatched power handling, efficiency, SPL, dynamics and wide frequency response.
- Large speaker performance, yet when buried they offer a very small visual footprint.
- Ellipse Bollards feature a sloped baffle that time aligns the woofer and tweeter for seamless natural sound.
- Pivoting tweeter for optimizing sound dispersion towards the listening area.
- Absence of flat parallel sides dramatically reduces internal standing waves.
- Specialized mounts for above ground and direct burial applications.
- Color through enclosure.
- Multi-layer environmental grill for an additional layer of protection.

All Coastal Source products, including the **Bollard** series, are designed to *Defy the Elements!*™

ELLIPSE BOLLARD™ speaker models

The Ellipse Bollards are angled baffle speakers that utilize an elegant form for an acoustical purpose.

front

angle

8.0 Mini Ellipse Bollard

Looks and feels right at home on decks or in the landscape. 8" diameter, 6.5" woofer, 1" pivoting tweeter.

front

angle

10.0 Ellipse Bollard Satellite

Designed for use in above ground applications where directional sound is desired with simplistic contemporary style. 10" diameter, 6.5" woofer, 1" pivoting tweeter.

front

grille

10.0 Ellipse Bollard

The model that started the line and set a new standard for outdoor sound. 10" diameter, 7"x10" woofer, 1" pivoting tweeter.

front

grille

10.0 3-Way Ellipse Bollard

The only true full range single point source speaker. Extreme performance! 10" diameter, 8" subwoofer, 6.5" woofer, 1" pivoting tweeter.

BOLLARD™ subwoofer models

front

grille

10.0 Ellipse Bollard Subwoofer

The same form-factor of the 10.0 2-Way model with a powerful 7x10 sub driver to complete the Ellipse Bollard family. 10" diameter, 7"x10" subwoofer.

front

10.0 Bollard Subwoofer [available Q4 2016]

Elegant low visual impact subwoofer with dynamic bass detail and extension. Suitable for above and in ground installations. 10" diameter, 8" subwoofer.

14.0 Bollard Subwoofer [available Q4 2016]

Powerful direct burial subwoofer for high power systems where extreme bass is a primary requirement. 14" diameter, 12" subwoofer.
